Product family datasheet

LEDriving FOG

High performance LED fog light with integrated daytime running light

LED lightguide technology
The three-dimensional optical fiber generates an exceptionally homogeneous light

2 in 1
An innovative all-rounder: fog light and daytime running light

6000 K
Substantially higher color temperature compared to conventional fog lights for better visibility

Experience a whole new dimension in brightness

LEDriving FOG ist the first OSRAM LED fog light using uniform light guide optics. This LED light sets the standards with its broad beam angle, guaranteeing a wider field of vision. LEDriving FOG provides the perfect replacement for most modern fog lights and can also be deployed as a daytime running light. The fog light is compatible with 12-volt and 24-volt systems and provides a bright and efficient LED light of 6,000 Kelvin. Thanks to the plug & play installation the replacement of your existing fog lights is made very easy. OSRAM provides a 5-year-guarantee for this LED fog light. Note: LEDriving FOG is certified according to ECE, SAE, and CCC regulations (ECE E1 approval; ECE R19/R87 approval).
